HAND OF DOORS

Right Hand

Left Hand

Right Hand Reverse

Left Hand Reverse

The hand of a door is determined from the OUTSIDE, except French window doors on which the hand is taken from Inside, when cremone bolts or casement fasteners are used.

The outside of an Entrance door is the street side.

The outside of a Room door is the hall side.

The outside of a Closet door is the room side.

The outside of a Communicating door is the side from which, when the door is closed, the butts cannot be seen.

The outside of Twin doors is the side between the two doors.

The inside of a French door is the side on which the cremone bolt is applied.

Standing outside the door if the butts are on the right it is a right hand door; if on the left it is a left hand door.

If, when standing outside, the door opens from you, or inward, it takes a lock with regular bevel latch bolt; if it opens toward you, or outward, it takes a lock with reverse bevel latch bolt (See illustration above.)

Locks described as "Reversible" can be used on doors of either hand.

Locks described as "Not Reversible" you must specify hand.
