**Designs with Emblems**

It is often desirable to indicate the character of a building by emblems or seals upon the knobs or escutcheons. Especially is this true of buildings housing Masonic or other lodges; also of municipal, state or government buildings, where the coat of arms or public seal may be introduced; and of buildings for railroad companies, banks, etc., where the name or seal of the corporation is frequently used. For special knobs see page 449.

We invite inquiries and correspondence regarding the production of this class of work, for which we have unequalled facilities.
